Education

Bandung Institute of Technology | Bachelor of Information Systems and Technology | GPA 3.62 (Cum Laude) *Aug 2022 - Jul 2026*

Relevant Coursework: Algorithms and Data Structures, Object-Oriented Programming, Database Systems, Computer Networks, Embedded Systems, Software Engineering, Information Security, Data Analytics, Artificial Intelligence.

Experience

PT Siemens Indonesia – Software Developer Intern ***Jakarta | Jan 2026 – Apr 2026***

Manufacturing Engineer Team

- Modified and maintained a Laravel-based factory visitor and quality access logging system used daily by 200+ personnel
- Troubleshot production devices (marking systems, tablets, shared Excel logs) to ensure stable operation within factory network and VPN environment

PT Toyota Astra Motor – Software Engineer Intern ***Jakarta | Jul 2025 – Sep 2025***

Information System and Technology Division – IT Asset Management

- Designed and deployed an internal asset management system supporting lifecycle tracking of 7,000+ enterprise IT assets
- Built modules for asset movement, audit workflows, and inventory monitoring, replacing manual tracking processes
- Authored system design and deployment documentation and coordinated implementation across multiple internal teams

PT Toyota Motor Manufacturing Indonesia – Regulatory Analyst Intern ***Jakarta | Jan 2025 – Feb 2025***

Vehicle & Part Logistic Division – Government Regulation Reform Department

- Developed a Python-based pipeline to extract and reconcile 8,000+ customs and invoice records from PDF documents
- Automated OCR-based data extraction and validation, reducing manual reconciliation effort by over 70%
- Implemented batch processing workflows to improve consistency and audit readiness of regulatory reporting

Trich AI Barberspace – Front-End Developer (Part-Time) ***Bandung | Nov 2024 – Nov 2025***

- Built and launched the barbershop's public website end-to-end with Next.js
- Developed responsive promo, product catalog, and location pages with Google Maps and click-to-call contact

URPA ITB – Head of Communication and Media Division ***Bandung | May 2024 – Jul 2025***

- Led a 10-person media team running social media, publication, and documentation for swimming events

Projects

Netflow | IoT Prepaid Utility Metering System | Project Demo ***Jun 2026***

- Built a NestJS + MySQL backend streaming live MQTT telemetry from 2,444+ smart meters into prepaid token billing
- Engineered a 13-detector anomaly engine (tamper, reverse-flow, sensor-fault) backed by 166 unit tests
- Secured multi-tenant access with Google OAuth 2.0, JWT, and RBAC across buildings

Genealogy Platform | Full-stack System Design | Project Demo ***Mar 2026***

- Built a full-stack application (NestJS, Next.js, PostgreSQL) using a shared-type monorepo architecture
- Designed a custom graph layout engine for complex family structures using BFS-based positioning logic
- Implemented interactive visualization with React Flow, supporting multi-parent and non-linear relationships

Fraud Detection System | Custom ML Pipeline | Project Demo ***Dec 2025***

- Engineered an end-to-end fraud detection pipeline on 100k+ transactions with severe class imbalance (~14%)
- Implemented Decision Tree, Logistic Regression, and KNN from scratch, including gradient descent and L2 regularization
- Improved fraud recall from 0.02 to 0.52 using class weighting and SMOTE, reducing false negatives by 25×
- Benchmarked performance against Scikit-learn models, identifying ~330× efficiency gap in non-vectorized implementations

Certifications

Machine Learning Engineer | BNSP | Credential *Sep 2026*
TOEFL ITP (Score 593) **|** ETS | Credential *Aug 2026*
Azure AI Fundamentals (AI-900) | Microsoft | Credential *Mar 2026*
IT Service Management (ITIL) | BNSP | Credential *Dec 2025*

Achievement

BSI Scholarship Talenta Awardee 2025 | Bank Syariah Indonesia *Nov 2025*
Best Paper Award in Smart City GEMASTIK XVIII | Kemendiktisaintek RI *Oct 2025*
Top 8 Finalist in AI Innovation Challenge COMPFEST XVII | CS UI *Sep 2025*
3rd Place in NSCI Business Case Competition | NSCI x YLI McKinsey *Nov 2024*

Skills

Languages & Core: Python, C, Java, TypeScript, JavaScript, PHP, SQL
Frameworks & Tools: NestJS, React, Next.js, Laravel, PostgreSQL, MySQL, Git, Figma, Docker, MQTT, Redis
